

SAFE GUARDING POLICY AND EVANGELISTIC MISSION

Mr Thomas Joseph

The Good Shepherd Congregation is on a great footing today. Today, we are in a new way of shaping mission activities in the strength and faith of the early Christian community, knowing the heart of Jesus, the Good Shepherd of this era, to the wounded and the weak. Our society is rushing to enter into the bliss of Christian equality where the mission advances in the equal participation of the Sisters and Partners-in-Mission. Let us be proud of God that our congregation is the guide of the new way of the new age to other congregations. All future formations may be affected at many levels by the threat, resentment, and anxiety that traditional formations present. Ultimately, we have the assurance of the truth that the Lord Christ is the head. In an ecclesiastical body inspired by St. Mary Euphrasia Pelletier, the Lord Jesus will give us faith-based hope and abiding love. Because he who calls is faithful to who does not speak.

The Good Shepherd Congregational Safeguarding Policy is the best anchor for the Good Shepherd Mission going forward. Because through this policy we can see the power of a fearless society. This policy has the potential to make any mission undertaken more effective. Through this policy we protect the vulnerable and the children, while developing and sanctifying our own mission. It provides more opportunities for open discussions and solutions to existing problems. The Safeguarding Policy is at the heart of every Good Shepherd Mission. All the ministries that come under the umbrella of Safeguarding are responsible to provide unity, quality and safety.

We love the Good Shepherd Safeguarding Policy for the reasons stated above and we can put our lives and lives together to implement it effectively. Because there is no greater love than to lay down one's life for the safety of others.
